## PROFILE SUMMARY

MCA graduate (2025) with strong experience in Java backend and full-stack development, specializing in Spring Boot, RESTful APIs, and SQL. Hands-on experience building scalable enterprise applications, data-driven systems, and fairness-aware AI frameworks. Comfortable working with databases, cloud platforms, and structured data workflows in production environments.

## RELEVANT COURSEWORK

|                              |                             |                     |
|------------------------------|-----------------------------|---------------------|
| Data structure and Algorithm | Object Oriented Programming | Database Management |
|------------------------------|-----------------------------|---------------------|

## EXPERIENCE

### TECH RESEARCH INTERN- DATA AND PLATFORM OPERATIONS

- HT Media – Tech Circle
- Jan 2026-Feb 2026
- Managed and optimized C-suite executive contact database using MySQL by cleaning, validating, and structuring records, improving data accuracy and searchability for business outreach.
  - Used SQL queries for deduplication, filtering, and targeted contact retrieval, reducing manual effort and enabling faster campaign/event coordination.

### WEB APPLICATION DEVELOPMENT INTERN

- RAYS and TARANG Technologies LLP
- Aug 2025-Nov 2025
- Developed a full-cycle Retail ERP solution covering vendor management, inventory movement, sales operations, and finance reporting.
  - Built an entity-relationship model with class-based design to handle purchase-to-sale workflows, reconciliation, and audit compliance.

## PROJECTS

- Employee Management System | *Java, Spring Boot, MySQL, REST APIs*
- Mar 2026
- Developed an Employee Management System with authentication, role-based access, and CRUD functionality using Spring Boot.
  - Implemented employee search/filter features and integrated MySQL database using modular layered architecture.

- Job Portal System with AI Chatbot | *Java, Spring Boot, MySQL, ReactJS*
- Apr 2026
- Developed a job portal platform supporting recruiter and candidate workflows, including job posting and application tracking.
  - Integrated REST APIs, search/filter functionality, and an AI chatbot for user support and query handling.

- Ethical Implications of Machine Learning in Healthcare | *Java, Weka, Machine Learning*
- Mar 2025
- Engineered and evaluated ML models (Naïve Bayes, Decision Trees, Logistic Regression) using 10-fold cross-validation.
  - Conducted bias and fairness analysis across models, and proposed ethical guidelines for AI use in clinical settings.

## TECHNICAL SKILLS

**Languages:** Java, SQL, Python, JavaScript, HTML/CSS  
**Databases:** PostgreSQL, MySQL  
**Frameworks:** ReactJS, Fast API, Spring Boot  
**Developer Tools:** Git (Bitbucket), VS Code, Azure  
**Knowledge:** Algorithmic Analysis and Design, Data Structure, REST APIs, POST requests

## EDUCATION

|                  |                      |
|------------------|----------------------|
| Amity University | Noida sector-125     |
| MCA CGPA– 7.94   | Aug 2023 – June 2025 |
| Amity University | Noida sector-125     |
| BCA CGPA – 8.38  | Aug 2020 – May2023   |

## PUBLICATION / RESEARCH

- Internet of things in Agriculture | Mentor: Dr. Alka | <https://ieeexplore.ieee.org/document/10079313>
- Reviewed IoT applications in agriculture, emphasizing smart farming solutions for real-time monitoring, automation, and supply chain optimization.
