EDUCATION

Amity University Noida sector-125
MCA CGPA – 7.94 *Aug 2023 – June 2025*

Amity University Noida sector-125
BCA CGPA – 8.38 *Aug 2020 - 2023*

EXPERIENCE

WEB DEVELOPMENT INTERN| HTML, CSS, PostgreSQL, JavaScript

Main flow services and technologies

- Architected the frontend interface and backend services, ensuring seamless integration and performance optimization.
- Implemented real-time order tracking and notification features, improving transparency and customer satisfaction.

DATA SCIENCE INTERN| Apache Flume, Hadoop ecosystem, Elastic search and Kibana

Kvch

- Configured Apache Flume agents to capture social media data streams from Twitter, Facebook, and Instagram.
- Implemented data preprocessing techniques to clean and enrich the raw data for sentiment analysis.

PROJECTS

YouTube Clone | *HTML, CSS, JavaScript, ReactJS, Redux, Sass, Firebase*

- Developed a fully functional YouTube clone using ReactJS, Sass, and YouTube Data API, achieving 90% UI/UX parity with the original platform and enabling seamless video search, playback, and navigation.
- Integrated Firebase Authentication and Redux, reducing state management complexity by 40% and enabling secure user login, registration, and session persistence across components.

A Framework for Auditing Bias in AI-Based Hiring Systems | Java, Weka, Classification Algorithms

- Developed and validated a Java-based framework to audit bias in AI-driven hiring systems, integrating Weka and classification algorithms to achieve 85% accuracy with models such as Decision Trees, Logistic Regression, and Neural Networks.
- Evaluated over 1,000 hiring decisions using fairness metrics (disparate impact, equal opportunity, demographic parity), revealing up to 30% bias variance across different models and datasets.

Ethical Implications of Machine Learning in Healthcare | *Java, Weka, Algorithms*

- Engineered and evaluated ML models (Naïve Bayes, Decision Trees, Logistic Regression) using 10-fold cross-validation, achieving up to 88% prediction accuracy on healthcare outcome datasets.
- Conducted bias and fairness analysis across models, identifying up to 25% prediction disparity in sensitive attributes, and proposed ethical guidelines for AI use in clinical settings.

Optimizing Healthcare Revenue Cycle with Azure Data Engineering | *Azure Data Factory (ADF), Azure Data Lake Storage (ADLS), Azure Databricks, Azure Synapse Analytics, Azure Machine Learning, Power BI & Synapse ML*

- Built an end-to-end Azure data pipeline that processed 10M+ records monthly, improving data accessibility and reducing ETL latency by 35% using ADF, ADLS, and Azure Databricks.
- Leveraged Azure Synapse Analytics and Power BI to create real-time dashboards and predictive models, enhancing revenue forecasting accuracy by 20% for a healthcare client.

PUBLICATIONS/ RESEARCH

Internet of things in Agriculture | Mentor: Dr. Alka | https://ieeexplore.ieee.org/document/10079313

Conducted a comprehensive review of IoT applications in agriculture, focusing on smart farming technologies for monitoring, automation, and supply chain optimization. The paper analysed recent advancements in sensor networks, data analytics, and cloud platforms used in precision agriculture. Key challenges such as data security, scalability, and technology adoption were identified, and future research directions were proposed to enhance productivity and reduce post-harvest losses.

COURSE WORK

- Data structure and Algorithm
- Object Oriented Programming
- Database Management
- Operating system
- Cloud computing

TECHNICAL SKILLS

Languages - Java, SQL, Python, JavaScript, HTML/CSS
Databases – MongoDB, PostgreSQL, MySQL
Frameworks – React JS, Node JS, Flask, Material-UI
Developer Tools - Git, VS Code, NetBeans, Azure
Knowledge - Algorithmic Analysis and Design, Data Structure, Object-oriented programming, Operating System, Database Management System, Big Data Processing (PySpark), ML Basics
