PROFILE SUMMARY

MCA graduate (2025) with hands-on experience in Java, Spring Boot, Python, MySQL, and Power BI. Skilled in backend development, SQL, data analytics, and business intelligence, with experience building REST APIs, interactive dashboards, and data-driven applications. Passionate about developing scalable software and delivering actionable insights through data.

RELEVANT COURSEWORK

Data structure and Algorithm Data Visualization Database Management Data Analytics

EXPERIENCE

DIGITAL MARKETING INTERN-DATA ANALYTICS & BUSINESS INTELLIGENCE

Loans Jagat July 2026 - Present

- Developed interactive Power BI dashboards to track marketing KPIs and campaign performance. Queried and analysed data using MySQL for metrics such as target vs actual spend and leads.
- Used Python for data cleaning, transformation, and preprocessing. Built automated reports and visualisations to support data-driven marketing decisions.

TECH RESEARCH INTERN- DATA AND PLATFORM OPERATIONS

HT Media – Tech Circle Jan 2026 - Feb 2026

- Collected, cleaned, validated, transformed, and analysed enterprise datasets using SQL to improve data quality and support business operations.
- Used SQL queries for deduplication, filtering, and targeted contact retrieval, reducing manual effort and enabling faster campaign/event coordination.

WEB APPLICATION DEVELOPMENT INTERN

RAYS and TARANG Technologies LLP Aug 2025 - Nov 2025

- Developed a full-cycle Retail ERP solution covering vendor management, inventory movement, sales operations, and finance reporting.
- Built an entity-relationship model with class-based design to handle purchase-to-sale workflows, reconciliation, and audit compliance.

PROJECTS

Employee Management System | Java, Spring Boot, MySQL, REST APIs Mar 2026

- Built REST APIs with authentication, role-based access, and CRUD operations.
- Integrated MySQL using layered architecture.

Job Portal System with AI Chatbot | Java, Spring Boot, MySQL, ReactJS Apr 2026

- Developed a job portal platform supporting recruiter and candidate workflows, including job posting and application tracking.
- Integrated REST APIs, search/filter functionality, and an AI chatbot for user support and query handling.

Ethical Implications of Machine Learning in Healthcare | Java, Weka, Machine Learning Mar 2025

Evaluated ML models using cross-validation and conducted fairness analysis.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript, HTML/CSS

Data & AI: SQL, Microsoft Excel, Google Sheets, Power BI, Data Cleaning, Data Visualization, ETL, Business Intelligence, Machine Learning

Cloud & DevOps: Azure, AWS (Basic), Git, GitLab, VS Code, Postman

Software Engineering: SDLC, Agile, Scrum, Object-Oriented Programming, Data Structures & Algorithms

Databases: PostgreSQL, MySQL

Frameworks: ReactJS, Fast API, Spring Boot

Developer Tools: Git (Bitbucket), VS Code, Azure
